THE PROBLEM

MOST CASUAL GAMERS WILL NEVER MAKE MONEY PLAYING VIDEO GAMES.

PLAYERS HAVE FOUR TYPES OF GAMES TO CHOOSE FROM:

FREE-TO-PLAY

This is the most common type of modern AAA multiplayer game. Apex Legends and League of Legends are good examples of these types of games. Anyone can play, but if you want specific cosmetics or in-game characters, then you'll have to pay to get them.

PAY TO WIN

The opposite of play-to-earn games. Instead of earning money by playing, players have to pay to get in-game features and abilities that give them a competitive advantage. Without them, players feel like they are always a step behind, even if they're more skilled than their paying opponents.

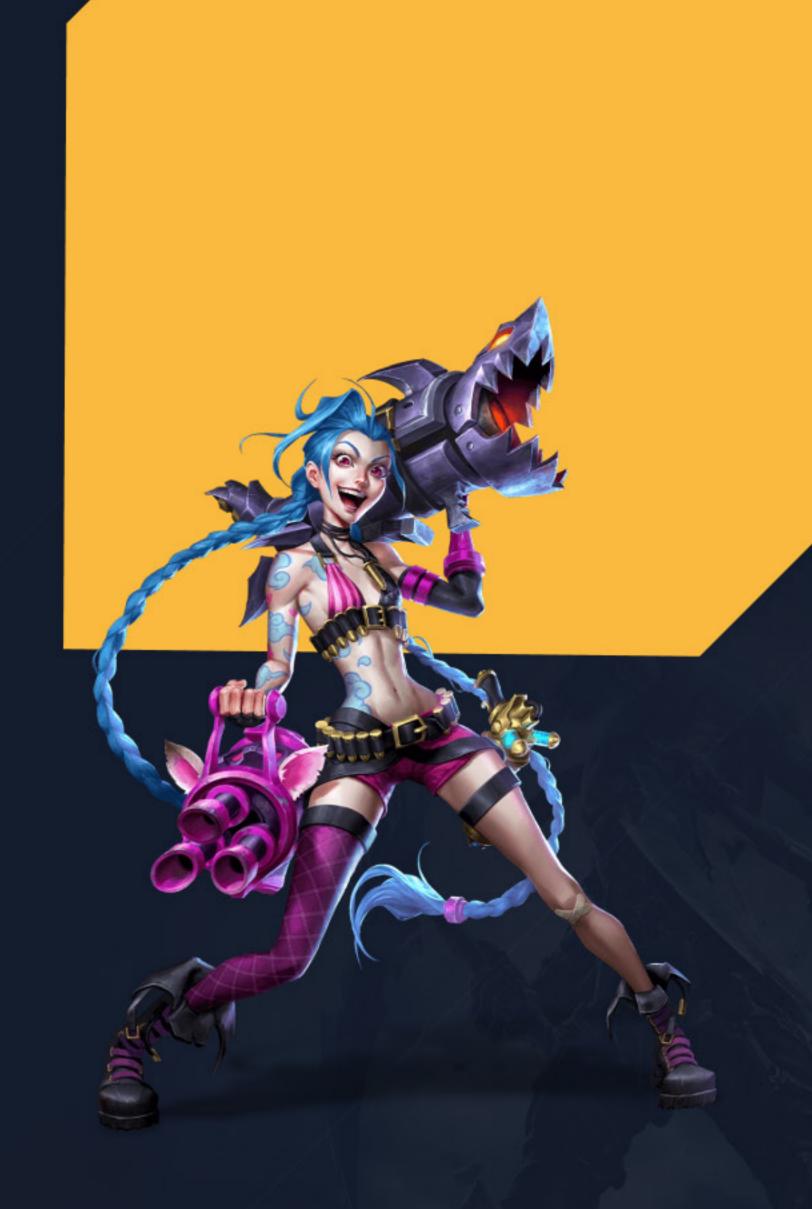

PAY-TO-PLAY

Most single-player story-based games and major franchises like FIFA, Halo, and Battlefield use this model. Instead of players earning money, players spend money to get access to the game.

PLAY-TO-EARN (P2E)

These are the games where players have a real chance to earn money using NFTs and a player-based economy that generates rewards in cryptocurrency. This model has been pioneered on the blockchain and popularized by projects like Axie Infinity and The Sandbox.

MOST PLAYERS CAN'T EARN BY PLAYING AAA GAMES

- Most earnings go to top streamers and Pro Tournament winners
- The majority of players don't have the time to become a professional or a top-level streamer and don't want to take the risk, leaving them without any meaningful rewards
- If players switch games or stop playing, all their in-game purchases end up having no value
- Developers and top-tier players benefit financially while casual players only receive entertainment value

PLAY-TO-EARN GAMES CREATE NEW PROBLEMS

- Play-to-Earn games often have boring gameplay or bad graphics, which sometimes makes earning money feel like a chore
- Removes player choice in which games they can play to earn crypto rewards
- Disparate blockchain games are not connected together; NFTs don't usually hold transferable value between games
- No common cryptocurrency between games, making most P2E tokens only valuable in a particular game economy

THE OPPORTUNITY

TO BRING TOGETHER THE BEST OF FREE-TO-PLAY AND PLAY-TO-EARN IN A SINGLE PLATFORM.

GAMING ALREADY REPRESENTS 2.5X THE MUSIC AND MOVIE INDUSTRIES COMBINED.

1 out of every 4 people play video games, making a total player base of more than 2 billion.

By 2025, analysts predict that the gaming industry will generate more than \$260 billion in revenue.

\$74B

MOVIE & MUSIC INDUSTRY

AS NFTS GROW IN POPULARITY, THE PLAY-TO-EARN GAMES THAT UTILIZE THEM WILL BENEFIT FROM A LARGER AUDIENCE

OpenSea

In 2021, OpenSea, the largest peer-to-peer marketplace for NFTs globally, was projected to do more than 20 billion USD in trading volume, up from 355 million USD in 2020.

More income per player

The player-based economies of Play-to-Earn games are shown to generate up to 5 times more income per player than traditional Pay-to-Play or Free-to-Play games.

Axie Infinity was the first Play-to-Earn NFT game to surpass 1 billion USD in sales. In 2021 it was projected to bring in 1.2 billion USD in sales from its approximately 600,000 users.

To put that in perspective, Candy Crush, published by Activision Blizzard, had more than 273 million users and generated less than 1.2 billion USD in sales.

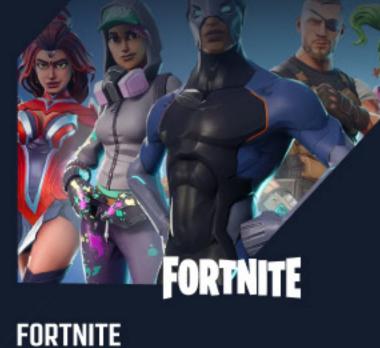

AAA GAMES ALREADY HAVE A MASSIVE **PLAYER BASE**

By tapping into the AAA player base and combining it with the wildly successful Play-to-Earn model, Bit Rivals can become a leader in the marketplace and capture a substantial portion of the market share. Here are player numbers from some of the largest AAA games:

PUBG Over 1 billion accounts as of March 2021

?

Over 80 million monthly active players and up to 4 million concurrent users every day

VALORANT

On average has 14 million monthly players

CALL OF DUTY WARZONE

Over 100 million players since its March 2020 launch

APEX LEGENDS

Approximately 100 million players worldwide

While there may be upwards of two billion gamers worldwide, a recent study estimated that there were less than 70 million blockchain wallets in existence. This means that potentially less than 3.4% of gamers are involved in cryptocurrency or blockchain-based gaming. The P2E model is at the very beginning of mass adoption with the players being early adopters.

THE PROPOSITION

WHAT IF GAMERS COULD EARN CRYPTO SIMPLY BY PLAYING THEIR FAVORITE VIDEO GAMES?

BIT RIVALS IS A FIRST-OF-ITS-KIND METAVERSE PZE CROSS-GAME REWARDS PLATFORM SPECIFICALLY DESIGNED TO INTEGRATE AAA GAMES

Our ecosystem is built on five zones

Rival Rewards

Our unique rewards system where players can earn Rival Points, \$\$RIVAL tokens, \$\square \text{Rival XP, Heroes & Item NFTs for playing their favorite AAA games.}

Rival Arena

Our tournament platform where players can create, host, and join their own tournaments to earn rewards and put their skills to the test against other players.

Rival Swap

Our DEX tool where players can buy, stake, and bridge their \$\$RIVAL to generate additional passive income from their holdings.

Rival Raffles

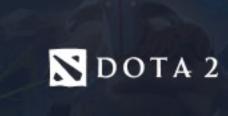

Spend your hard-earned Rival Points on raffle tickets to enter into our prize draws. Win a wide range of physcial and digital goods.

Rival Loot

Our platform's marketplace where players can spend their \$RIVAL and \$Rival Points to buy Rival Heroes, Items, and Vanity NFTs.

OUR UNIQUE MODEL LETS PLAYERS OF ALL SKILL LEVELS GET IN ON THE REWARDS

COMPETITIVE PLAY

- Pits players against opponents of similar skill levels to create a fair and enjoyable experience for everyone
- Players can form their own teams, clubs, and tournaments
- Opportunity to form official partnerships with highschool and collegiate gaming clubs, along with professional esports leagues
- Tournament organizers earn rewards, just like tournament winners, creating an even bigger incentive for players to get involved in the community

PLAY-TO-EARN

- Players can earn

 \$\$RIVAL tokens and

 Rival Points
 just for playing their favorite games
- As players rank-up and collect NFTs they can earn even more rewards at a quicker rate, giving them another reason to keep playing
- Free to start earning rewards
- Compatible with any game that has accessible player data
- Points can be exchanged for raffle tickets or used to upgrade NFTs
- \$RIVAL token reward earnings hold real monetary

METAVERSE NFTS

- Buying or upgrading NFTs allow players to earn \$\$RIVAL tokens for in-game achievements
- Players can re-roll item NFTs of the same rarity for a chance to receive one item of a higher rarity
- Creates a player-based economy where players can sell player-created NFTs to other players
- With only a limited quantity of NFTs available, players assets will increase in value over time due to scarcity, giving them another way to earn using our ecosystem

THE BIT RIVALS PLATFORM USES TWO TYPES OF CURRENCY

RIVAL POINTS

- Are not directly exchangeable for other currencies
- Can be earned by all players for free
- Can be used to unlock exclusive NFTs or exchanged for raffle tickets to win real-world products or crypto prize pots

RIVAL TOKENS

- Can be directly exchanged for other currencies using liquidity pairs CEXs and DEXs or staked on Rival Swap and added to liquidity pairs for passive income
- Used to buy Rival NFTs, which allow players to increase their passive \$RIVAL earnings when playing games
- Earned by players through Rival NFTs, winning raffles, or placing high in a tournament

HOW DO WE INTEGRATE WITH AAA GAMES?

For most AAA games, player data and match history are public. In fact, most game developers readily provide this data, along with the means to process it, to innovative platforms that can help expand the game's player base. This means that no partnerships are necessary to facilitate the integration of any games into the Bit Rivals platform.

In the majority of cases, data processing is done via an application programming interface (API) that can connect directly with third-party software. Overwolf, Porofessor, and Tracker.gg are just a few of the most popular sites and apps that are built using these APIs. The same potential exists for any blockchain Play-to-Earn game as long as player data is made available, such as Axie Infinity or Thetan Arena.

For example, a player connects their Steam account to Bit Rivals and begins playing Apex Legends. Using Apex Legend's API, Bit Rivals can gather data on the player's performance and use that data to reward the player for their in-game achievements, like takedowns, assists, and more.

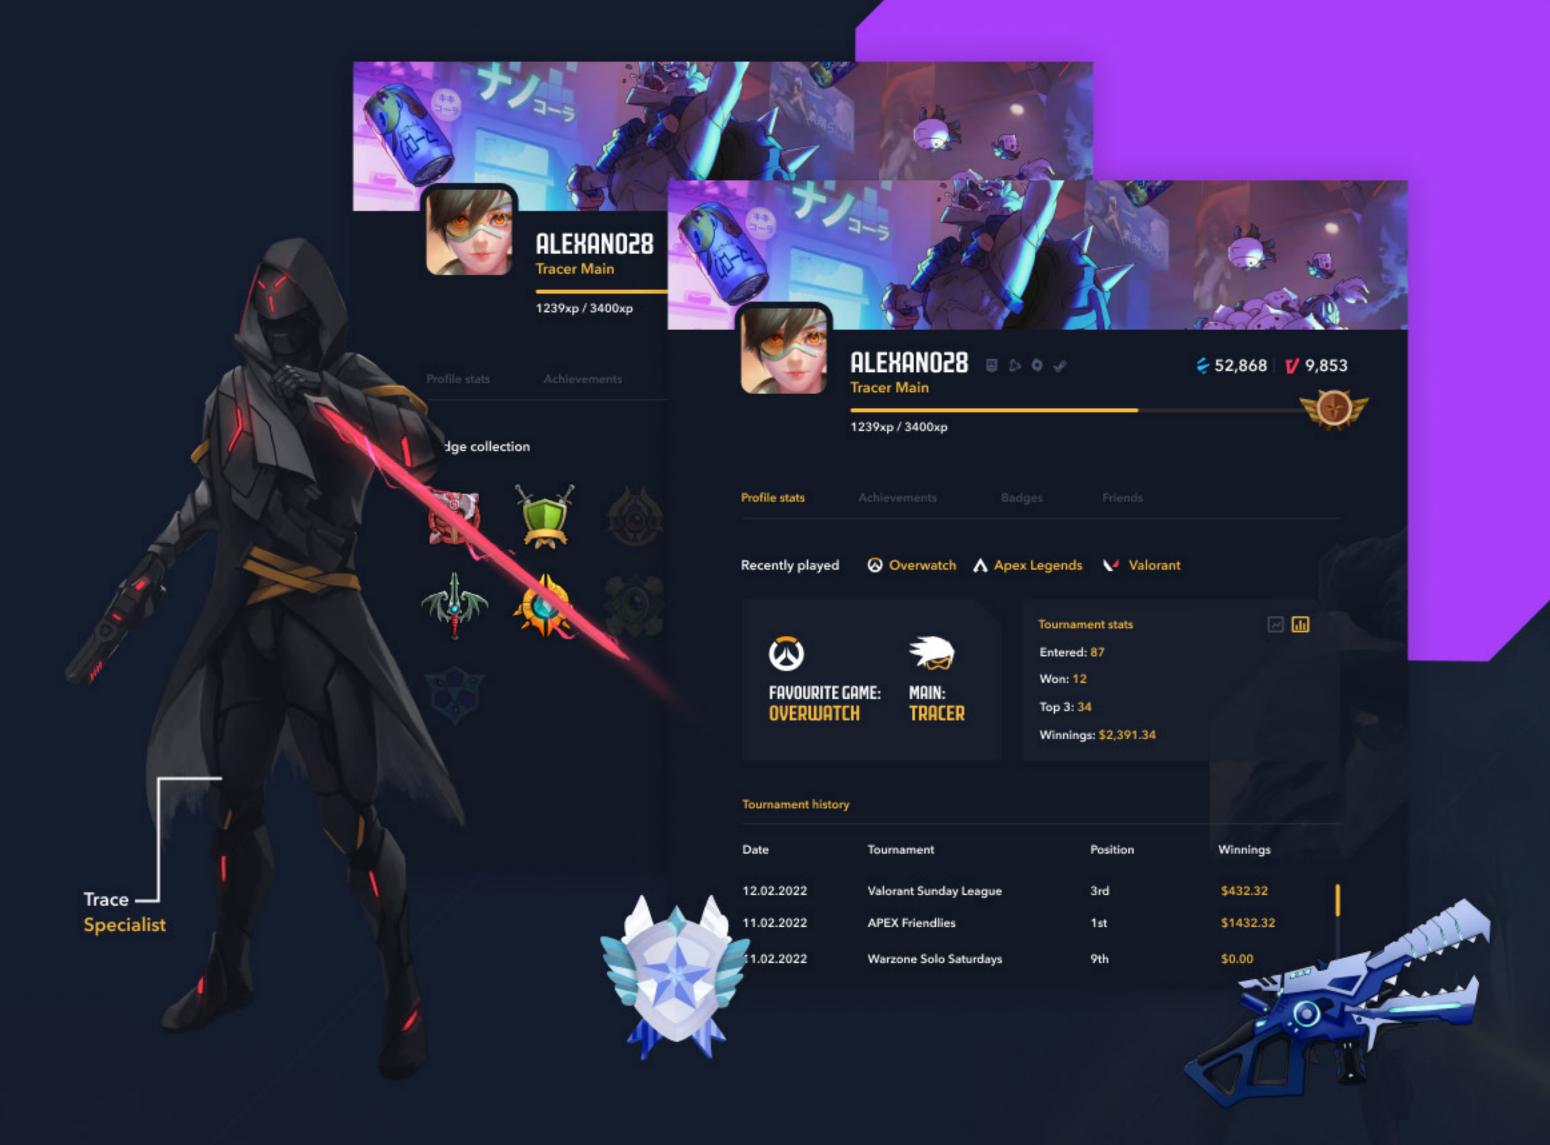

RIVAL ID THE ULTIMATE GAMER PROFILE

The Rival ID is a player's ultimate gamer profile and gateway to earning Rival Rewards. As they progress, players will earn badges and achievements to show off their skills and customize their profile, along with unique NFT backgrounds, collectibles, and titles for the community to see.

Players can integrate their Rival ID with their blockchain wallet or receive a free wallet through the platform if they don't already have one, add their ingame tags, and their favorite in-game roles and characters.

RIVAL XP SYSTEM

Players earn properties for the games they play, which allows them to level up in rank.

Higher ranks will allow players to use more powerful NFTs to increase their ability to earn \$RIVAL tokens.

Players must be at least Bronze level before they are able to withdraw the \$\$\$RIVAL tokens they have earned from their account.

ZONE OI

RIVAL ARENA

Players can join official Bit Rivals tournaments or create their own to compete for RIVAL against players of their own skills or earn \$\$\$RIVAL for being a reputable organizer in the community.

Two kinds of tournaments:

Free (no entry fee required)

Paid (entry fee)

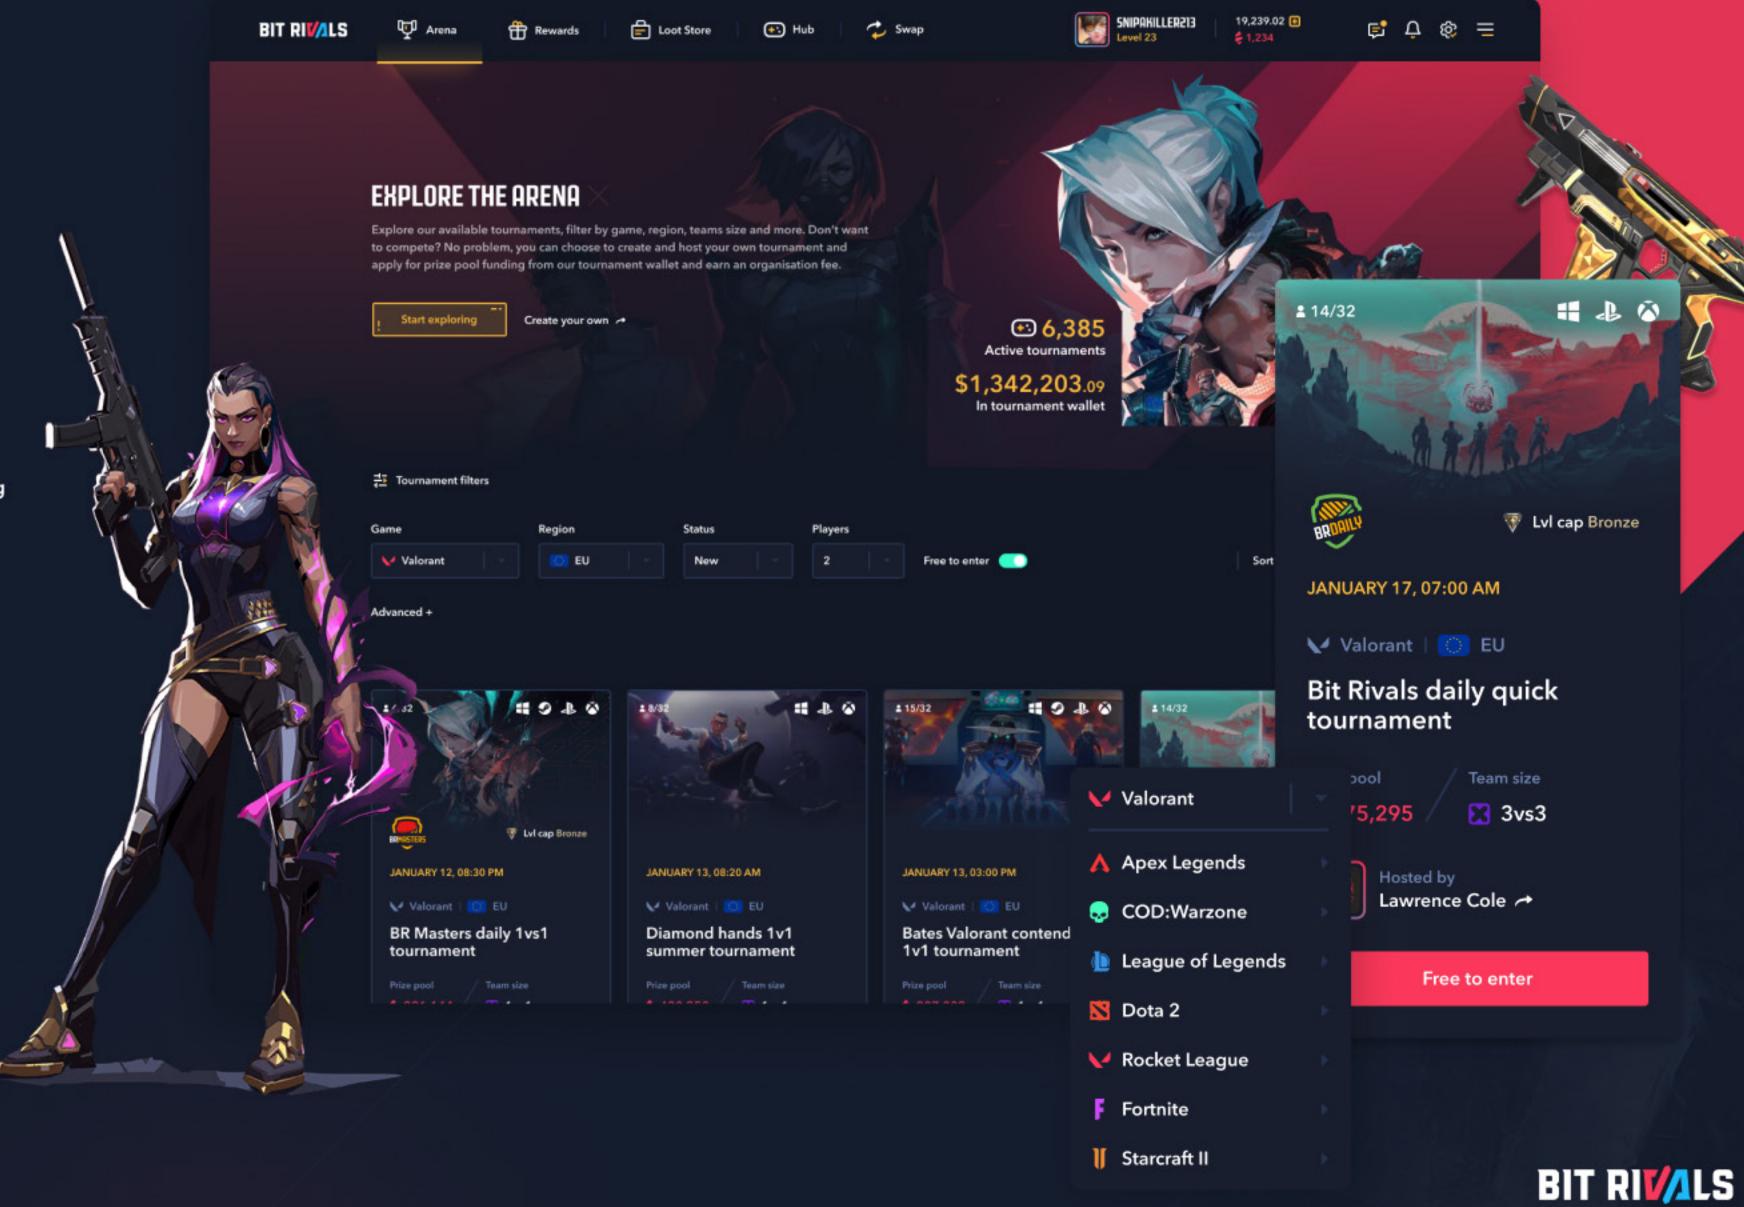

Tournament prizes come from:

Entry fees

Sponsorships

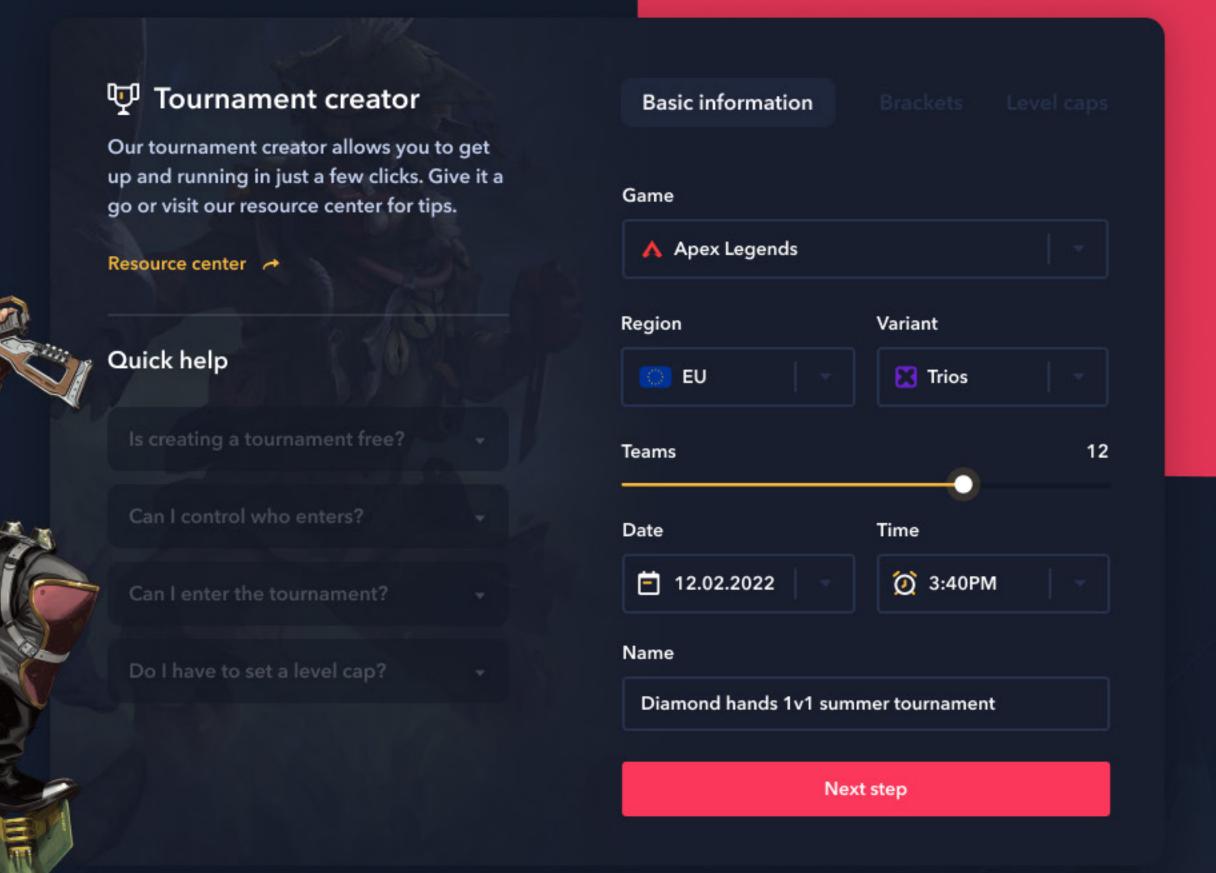

Gaming clubs

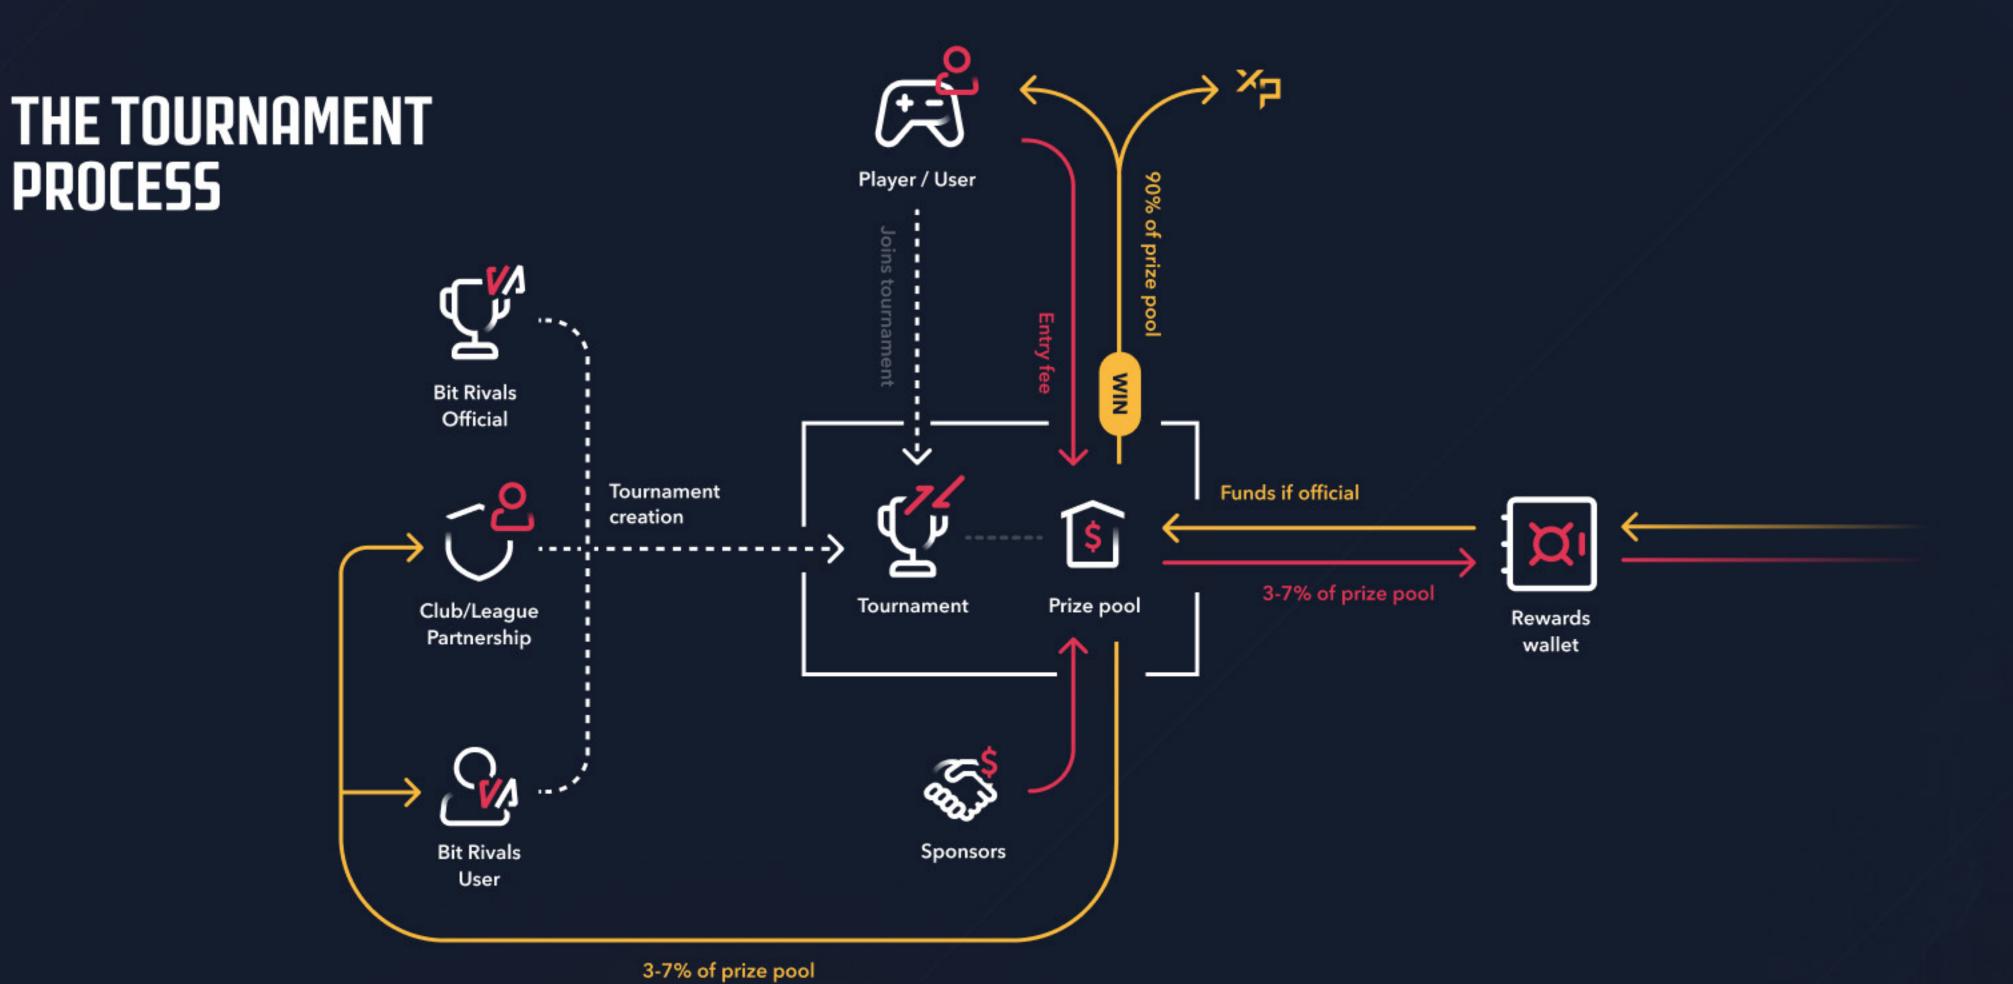

Rival Reserve wallet

CREATE YOUR OWN TOURNAMENTS IN SECONDS

Our arena system makes creating public or private tournaments quick and easy. Create a tournament, invite players and get playing in no time at all.

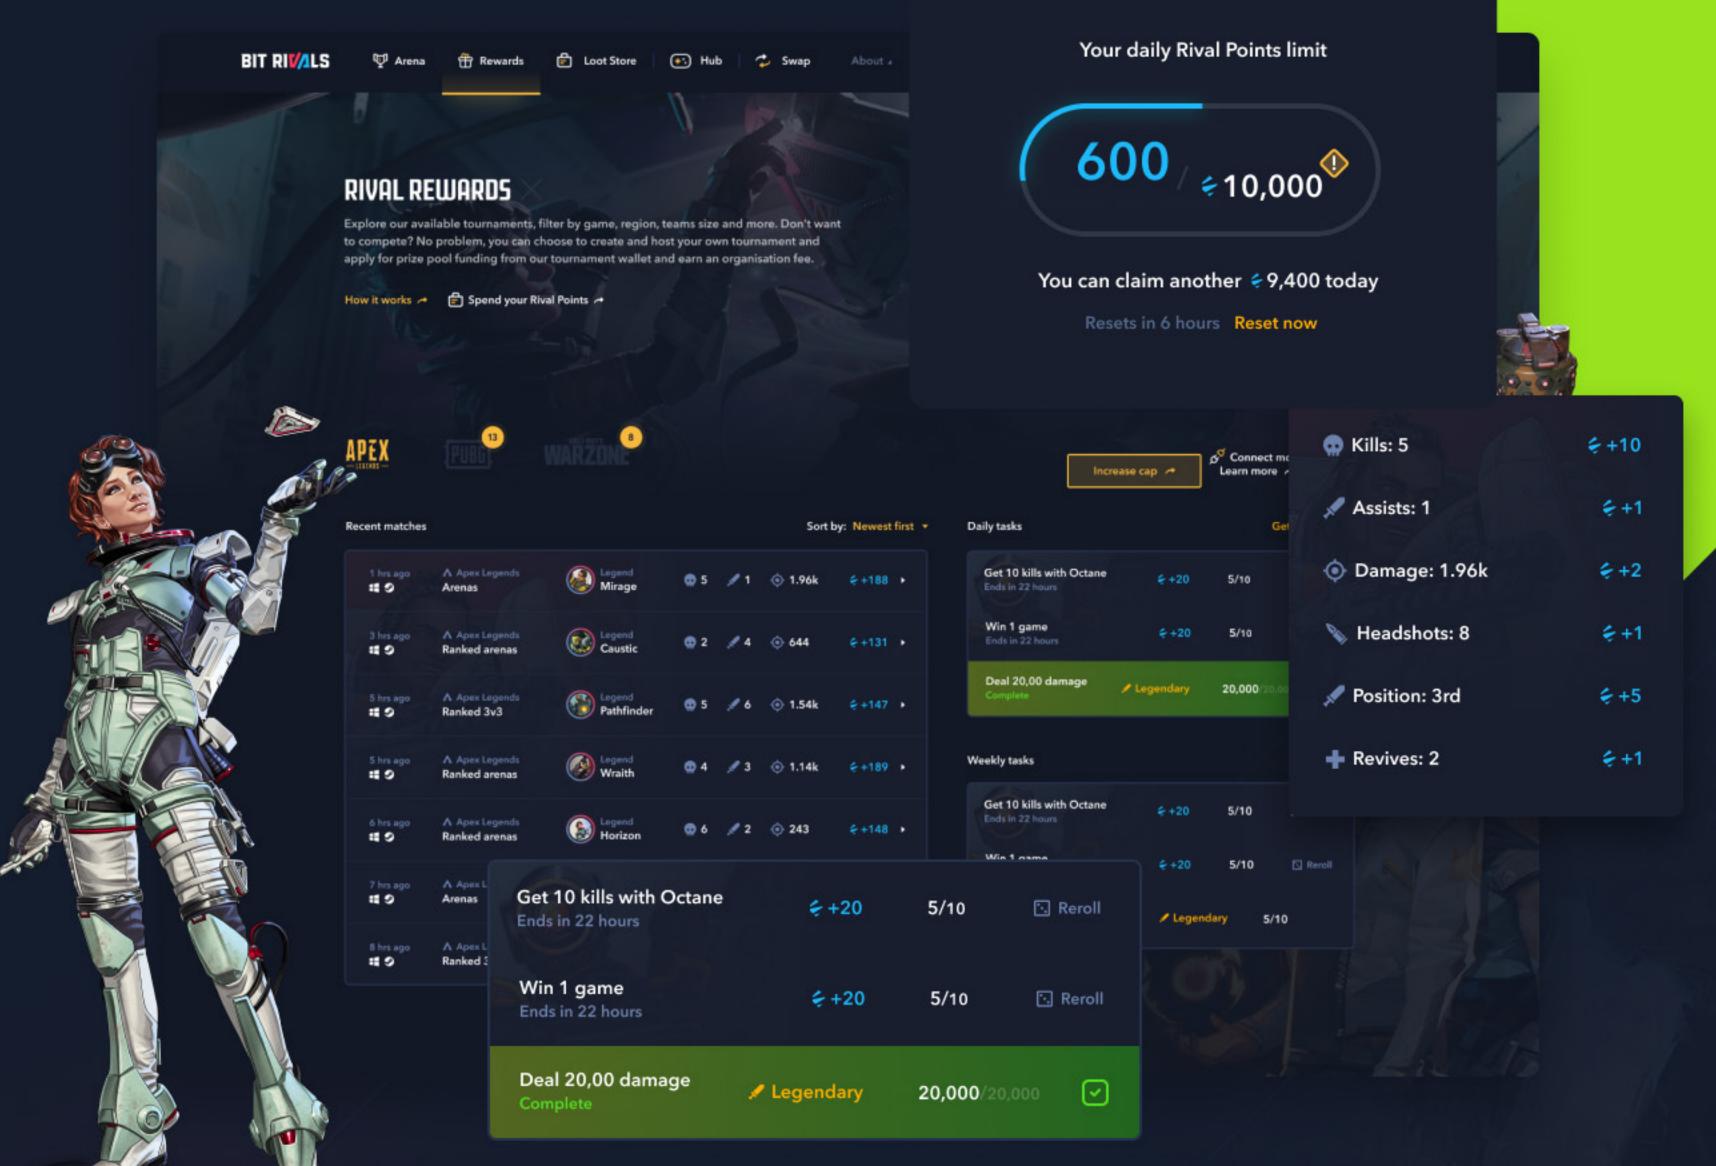

RIVAL REWARDS

Players can earn Rival Points by hooking up their Steam, Origin, Riot, or other gaming platform account to their Rival ID and hopping in-game.

Players will earn Rival Points for things like kills, damage, goals, special achievements, and through our task system. They can even unlock equipment that gives them extra perks or earnings.

Players can spend their Rival Points on raffle entries to earn prize pots, real world items, such as gift cards or gamer gear, or Rival Hero NFTs.

Rival Hero NFTs obtained through the marketplace or random draws will earn the player \$\$\$RIVAL tokens for every game played.

RIVAL5

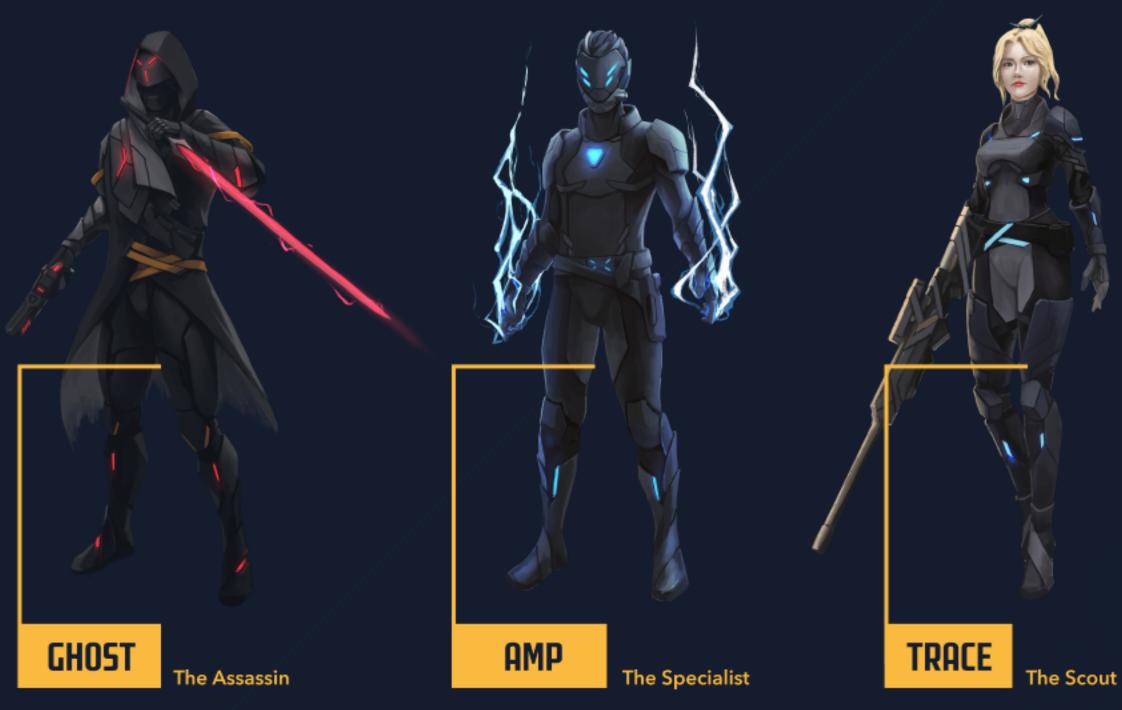

When players first sign up with their Bit Rivals account, they will get to choose between a number of starter characters as their own Rival Hero. Each Rival Hero will have its own perk for earning on the Bit Rivals platform.

As players continue to play and earn rewards, they will be able to spend their points to level up their personal Rival Hero. Once this hero reaches its maximum level, an exclusive NFT version of the hero can be minted, which allows players to earn \$\$RIVAL tokens for in game achievements or can be sold to other players.

Players can also purchase Rival Hero NFTs to earn \$RIVAL for their performance in any game where they've connected their in-game account to their Rival ID. For example, players could unlock a Rival Hero NFT that gives them 70 \$RIVAL tokens every time they win a match or 10 \$RIVAL tokens every time they lose a match in Call of Duty Modern Warfare.

Rival Hero NFTs will have a degree of rarity that directly corresponds to its earning potential. Legendary Rivals, the most rare in the metaverse, will be released in very limited quantities and will grant players the highest rate of earnings and additional perks.

CHOOSE YOUR RIVAL

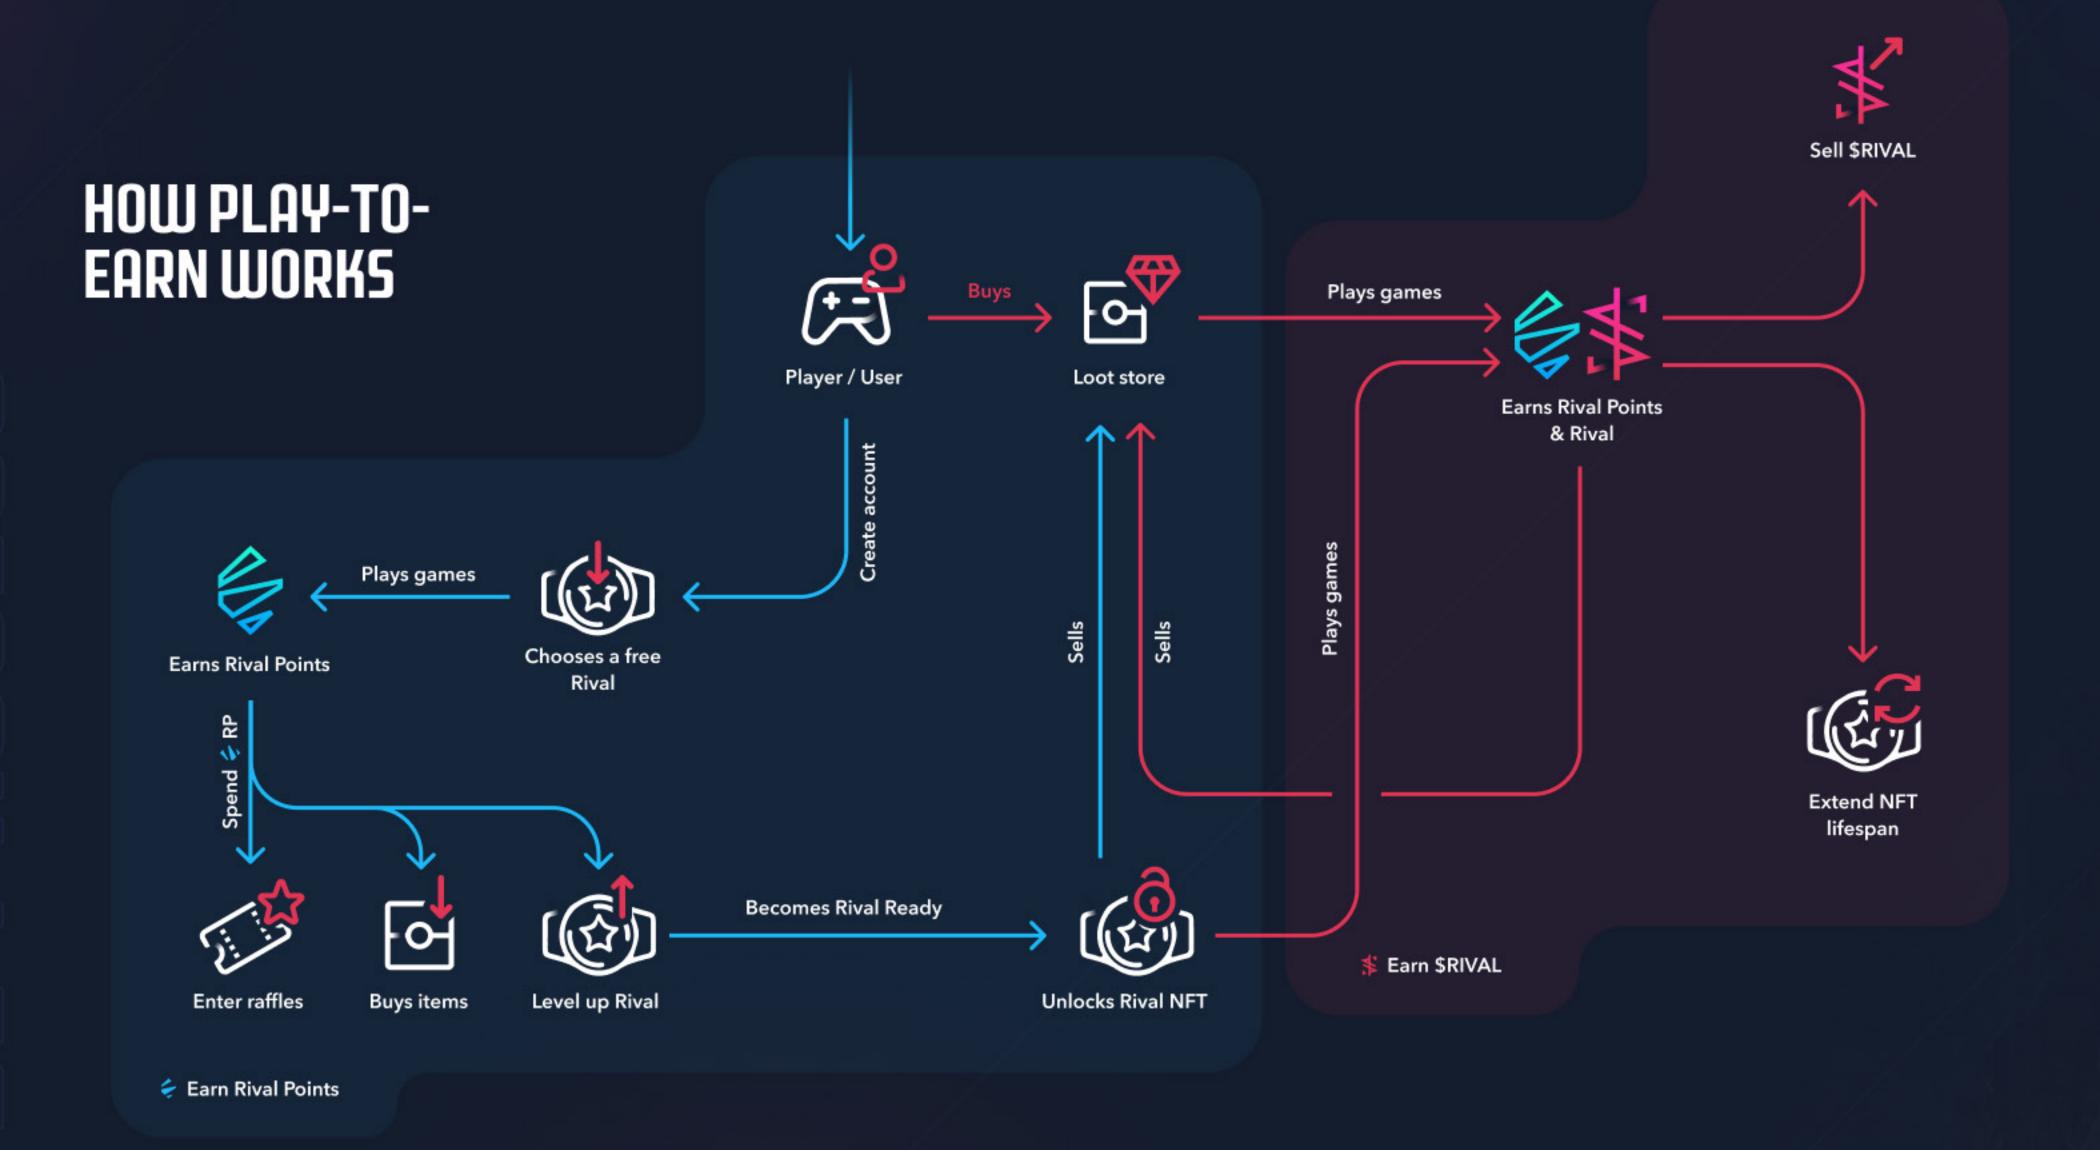

You gain 10% more *= experience in any games you play and win.

You got 1 more & Rival Point for each kill you get in a game.

Increase your daily 🕏 Rival point cap by 150.

RIVAL RAFFLE

Every week players can use their Rival Points to enter for a chance to win prizes such as:

\$100 in \$RIVAL tokens

A New Razer Headset

A \$25 Steam Giftcard

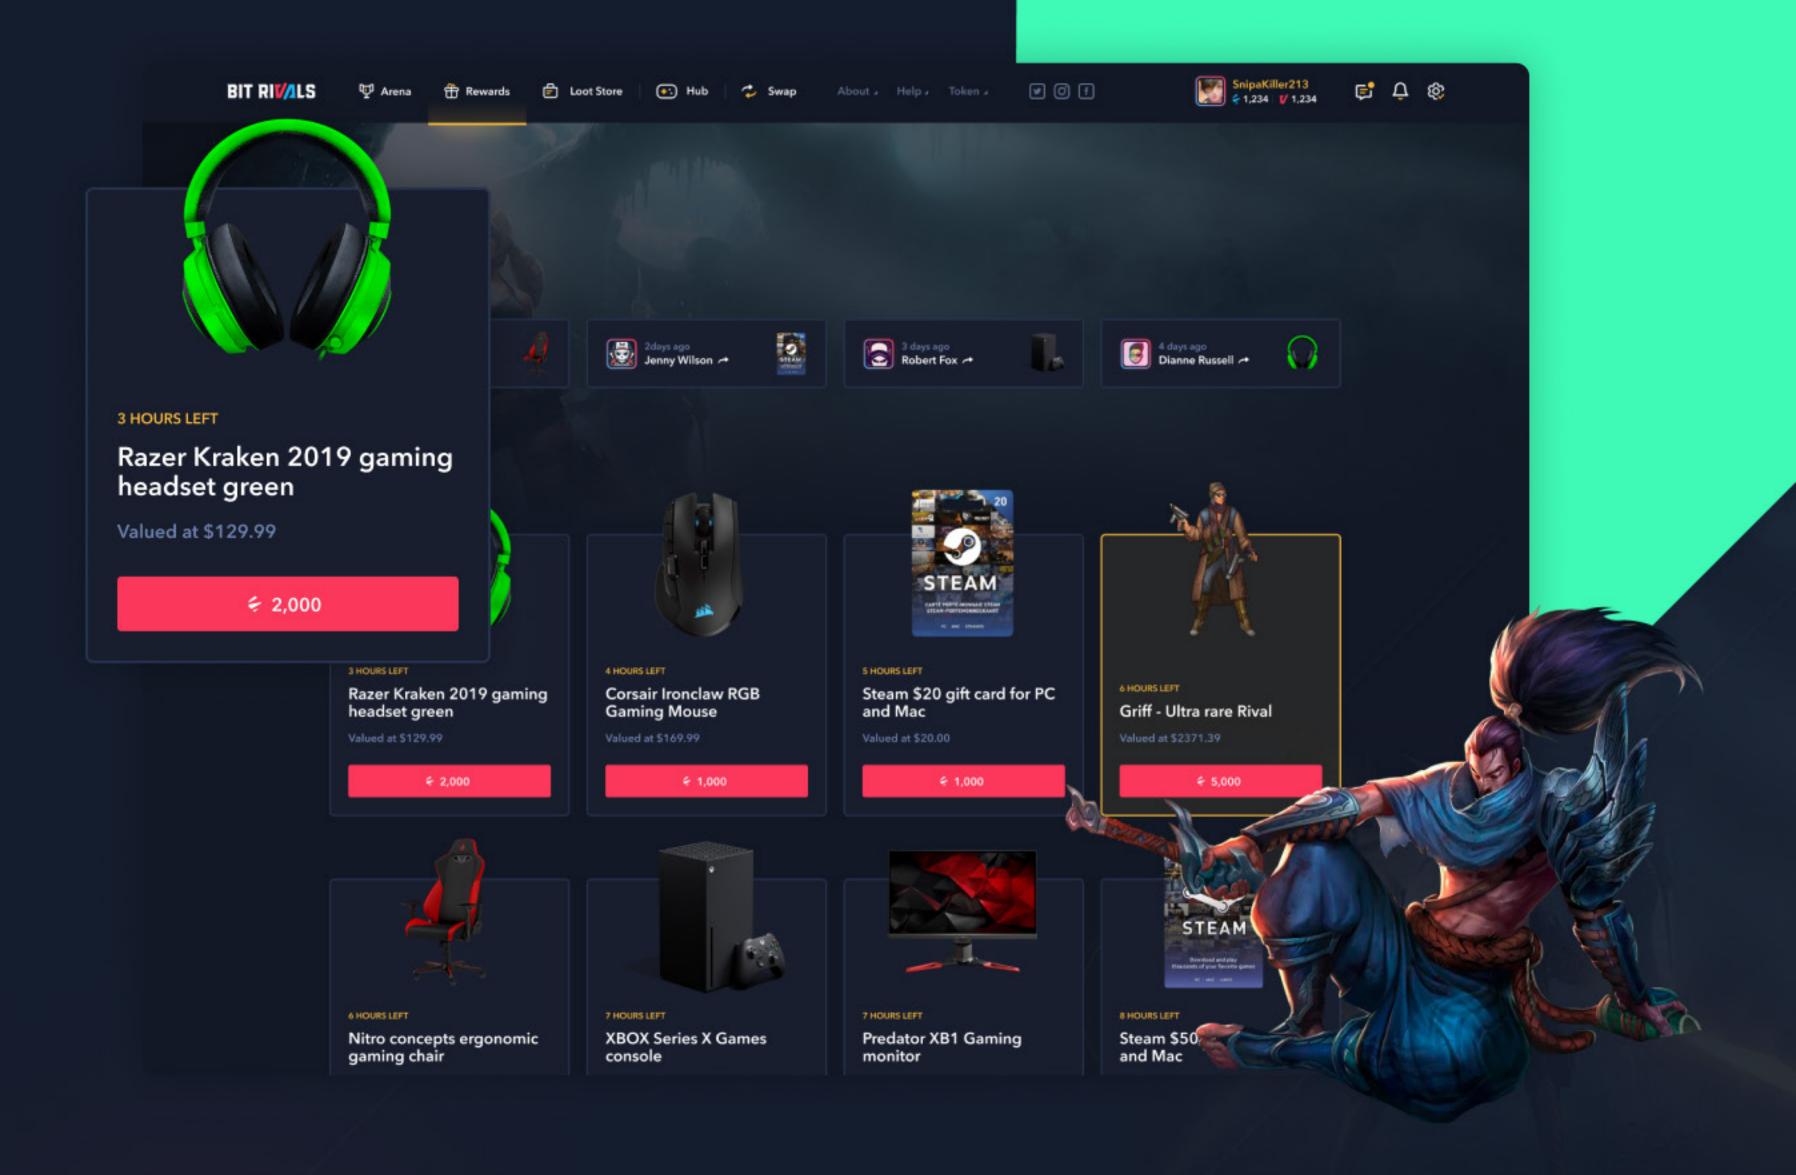

A New Logitech Gaming Mouse

A New Secretlab Gaming Chair

A 1950 Valorant Points Prepaid Gaming Card

An Exclusive Rival Hero NFT

Holders of \$RIVAL will have an increased max cap on Rival Raffle entries and be able to enter a higher tier of giveaway. One of the many ways to hold \$RIVAL.

RIVAL

Rival Hero NFTs

These NFTs are main way players can earn \$RIVAL tokens. Players can collect, purchase, upgrade, and sell these characters in the Rival lore, known as "Rivals," to earn \$RIVAL.

Item NFTs

These NFTs can be equipped by Rival Heroes to boost a player's earnings for specific in-game achievements. Similar to Rival Heroes, Item NFTs will be offered in different quantities based on type and rarity.

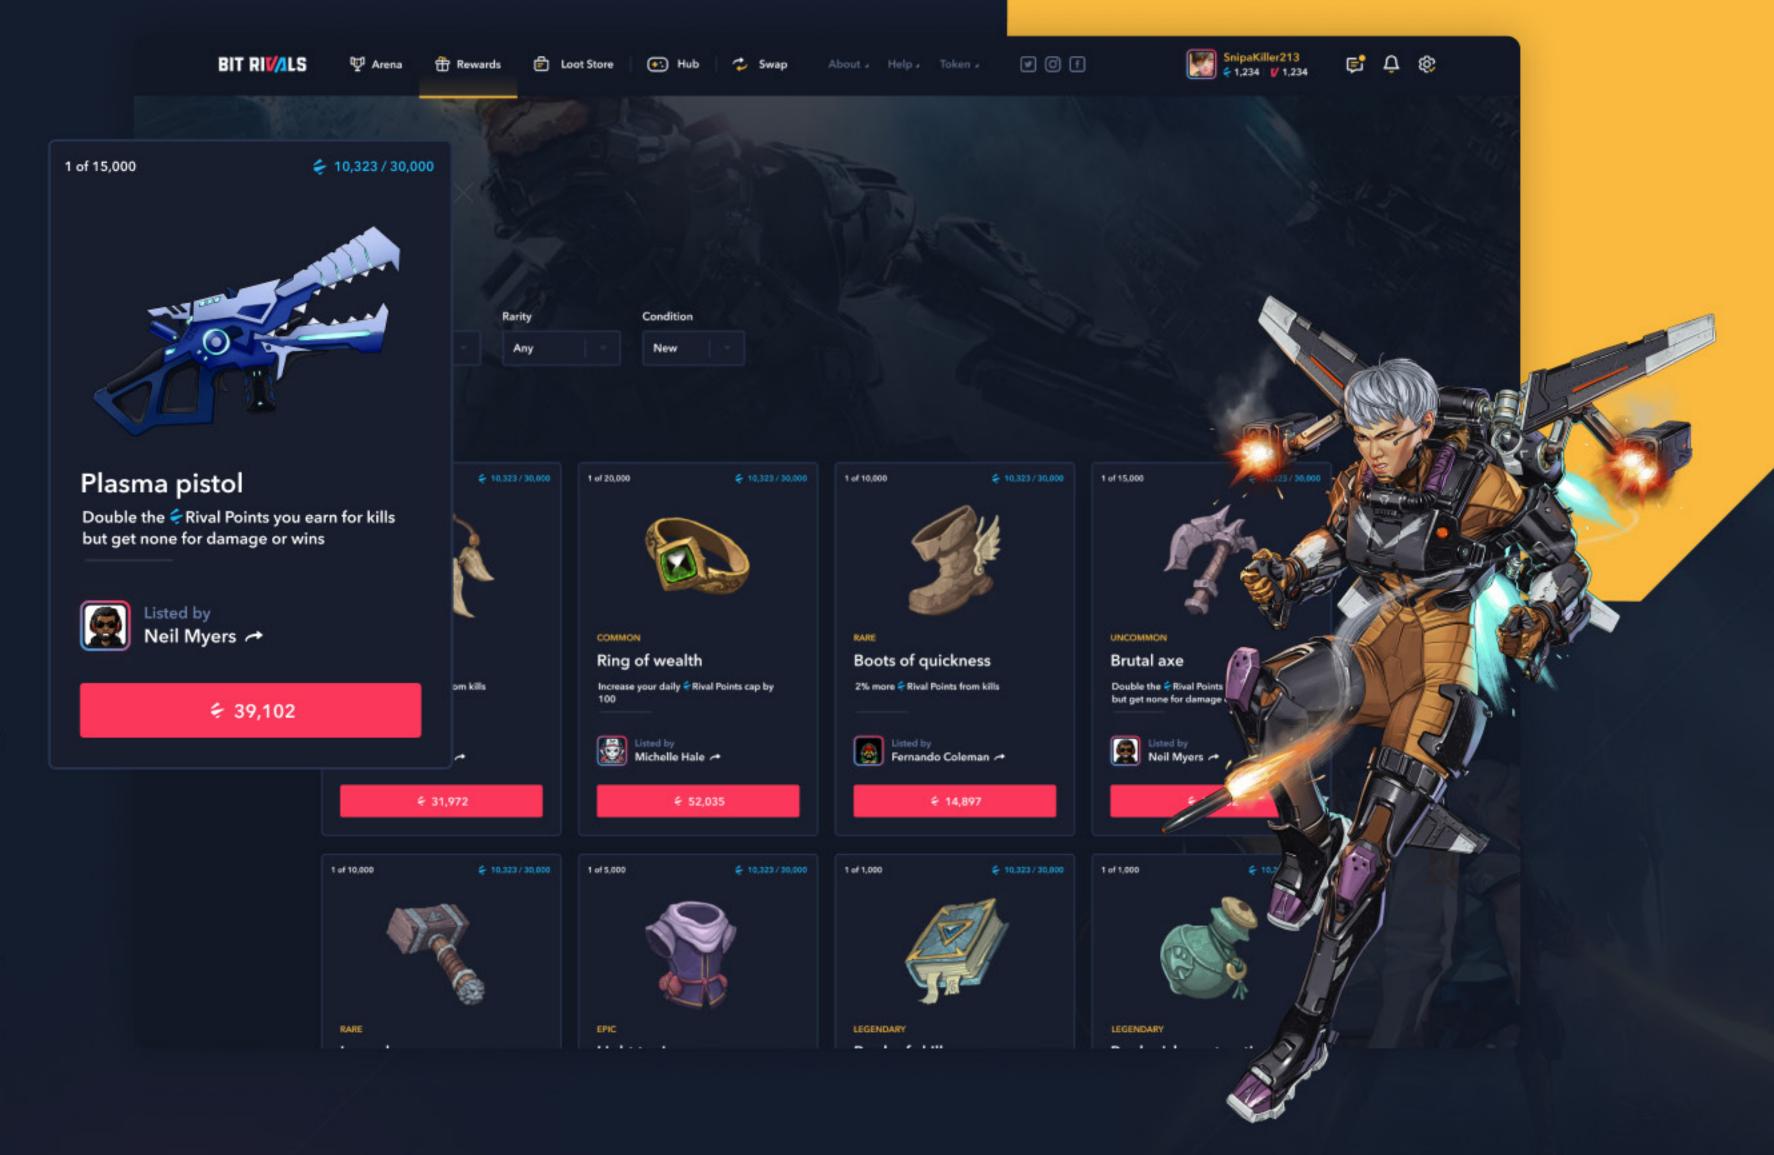

Vanity NFTs

These NFTs are displayed on a player's Rival ID profile and don't directly contribute to their in-game earnings. These will always be offered in limited quantities and can be traded between players in the Rival Marketplace.

Player-Minted NFTs

The Bit Rivals Marketplace will also have a place for players to mint and sell their own NFTs, allowing players and Bit Rivals partners to sell their own NFTs or official Bit Rivals NFTs to other players.

The Rival Loot Store has a small transaction fee on NFT sales between players that is used to fund additional Rival Rewards and development of the platform.

RIVAL SWAP

Rival Swap is our very own DEX tool that allows player's to swap, stake, and farm \$RIVAL.

Swap

Find the best rates for exchanging \$\$\$RIVAL token to use across the ecosystem.

Farming

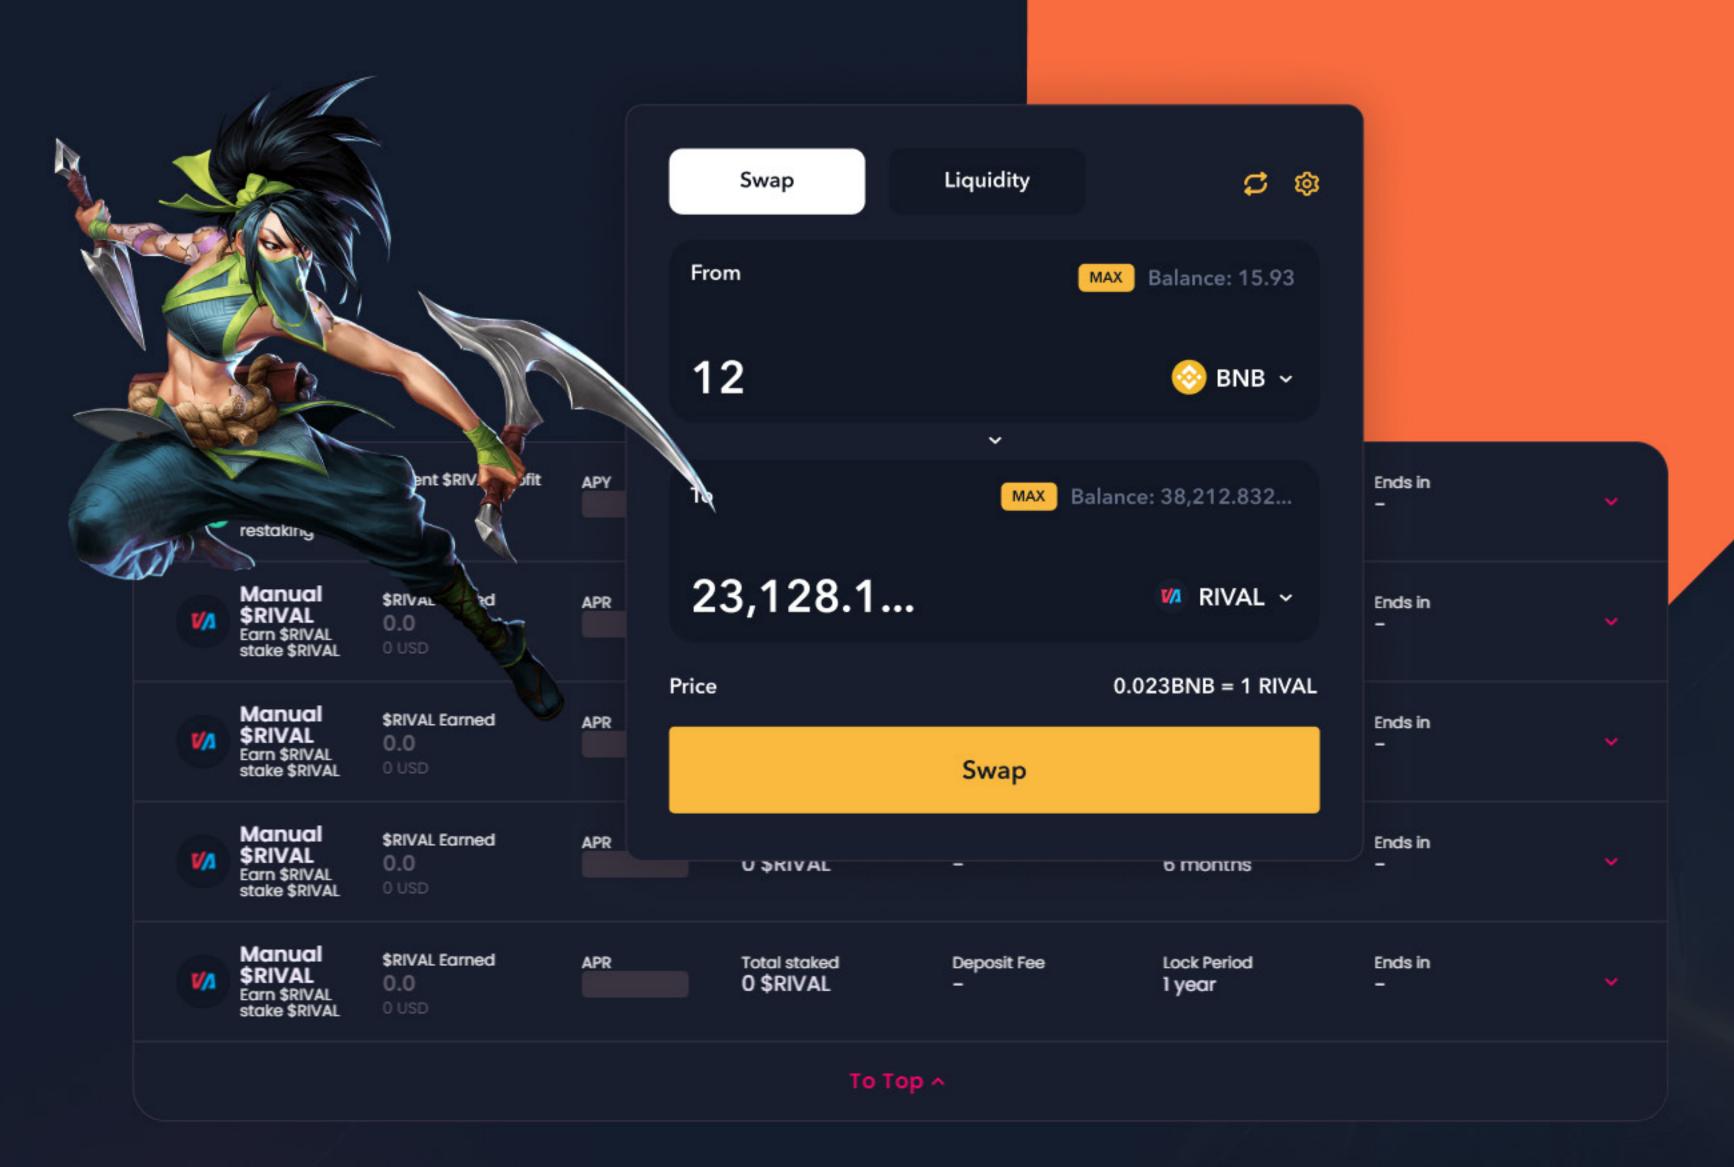

Find the best reward rate when adding \$RIVAL and \$BNB as a liquidity pair and gain interest on trading fees.

Pools

Stake \$\\$\$RIVAL to yield the highest single asset APY on your investment.

Bridge

Our cross-chain functionality. Exchange BSC \$RIVAL for pegged \$RIVAL tokens on other chains, such as Ethereum, Matic, or Cardano.

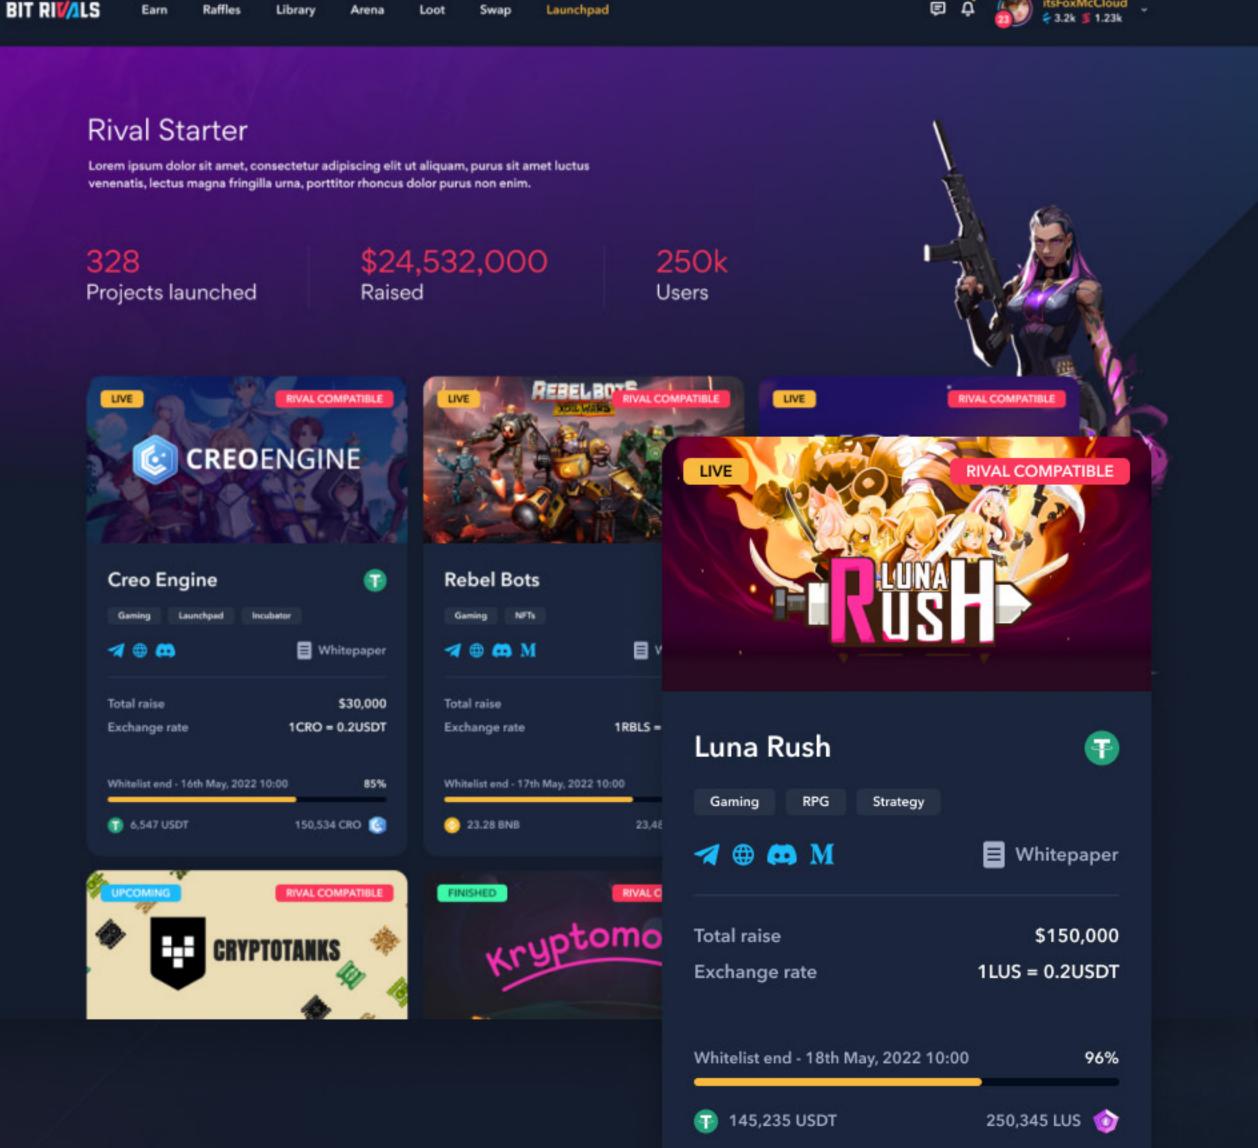

RIVAL STARTER

RivalStarter is an IDO / INO launchpad & investment group made from the most loyal \$RIVAL holders. The top 50 \$RIVAL holders, who must hold at least 1,000 \$RIVAL tokens for more than six months, make up the Rival Council. This council has ability to vote on new projects for investment, incubation, and initial offerings. Projects that pass the Rival Council's vote and Bit Rivals' rigorous vetting process, are onboarded and connected to a network of top-tier launchpads, VCs, Market Makers, CEXs, and KOLs to make the launch a success.

150,000 \$RIVAL - Sigma tier 100,000 \$RIVAL - Alpha tier 75,000 \$RIVAL - Beta tier 50,000 \$RIVAL - Gamma tier

Using Bit Rivals' unique platform design and game integration technology, RivalStarter helps new games reach the established audience of traditional AAA games by automatically integrating them into the Bit Rivals platform on launch. Through connections with Pogr.gg, Bit Rivals can help indie developers create meaningful APIs for their projects that will help them succeed.

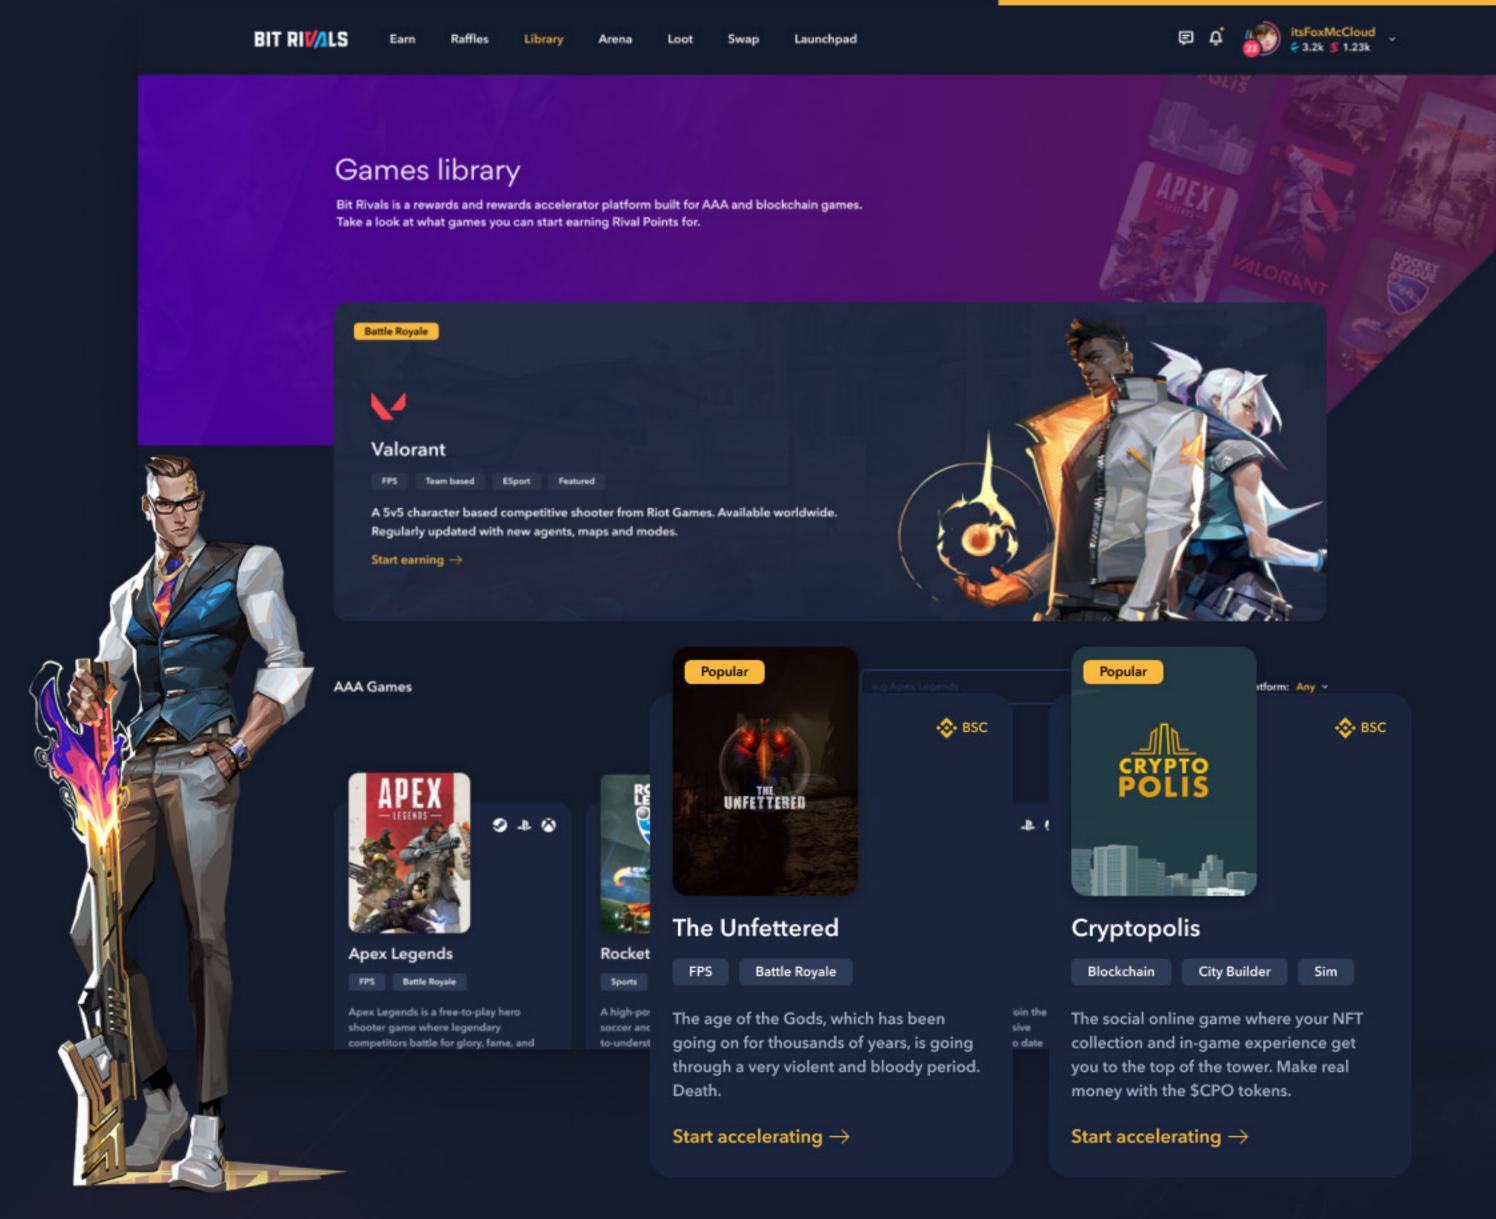

DISCOVER

The Discover page brings the devoted base of Web2 gamers and AAA title players into the next-generation Web3 gaming ecosystem, with an array of promoted Web3 games from big names and indie developers alike. Players can jump right in and start playing, earning, and rating their new-found favorite titles with just a few clicks.

Larger developers of Web3 titles can pay to be promoted on this page to reach a large and active player base, while smaller and indie developers can utilize Bit Rivals' incubation, advertising, and gaming integration services to take their project from concept to reality. Official partners are put on the fast-track to integration on the Bit Rivals platform, with partner Pogr.gg providing access to software development kits that will empower Web3 titles to enable APIs, easily integrate game data, and effectively gauge their playbase.

H. RESTRICTIONS ON DISTRIBUTION AND DISSEMINATION The distribution or dissemination of this WhitePaper or any part thereof may be prohibited or restrictions which are applicable to your possession of this WhitePaper or such part thereof (as the case may be) at your own expense and without liability to the Company. Persons to whom a copy of this WhitePaper has been distributed or disseminated, provided access to or who otherwise have the WhitePaper in their possession shall not circulate it to any other persons, reproduce or otherwise distribute this WhitePaper or any information contained herein for any purpose whatsoever nor permit or cause the same to occur. I. NO OFFER OF SECURITIES OR REGISTRATION This WhitePaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities or a solicitation for investment in securities in any jurisdiction. No person is bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this WhitePaper. Any agreement in relation to any sale and purchase of \$RIVAL Tokens (as referred to in this WhitePaper) is to be governed by only the T&Cs of such agreement and no other document. In the event of any inconsistencies between the T&Cs and this WhitePaper, the former shall prevail. No regulatory authority has examined or approved of any of the information set out in this WhitePaper does not imply that the applicable laws, regulatory requirements or rules have been complied with. J. MODIFICATIONS The Company reserves the right to amend and revise this WhitePaper without notice. K. RISKS AND UNCERTAINTIES Prospective purchasers of \$RIVAL Tokens (as referred to in this WhitePaper) should carefully consider and evaluate all risks and uncertainties associated with the \$RIVAL Token, the Company and its business and operations, the \$RIVAL Token Sale and the underlying assets (each as referred to in the WhitePaper), and all information set out in this WhitePaper and the T&Cs prior to any purchase of \$RIVAL Tokens. If any of such risks and uncertainties develop into actual events, the business, financial condition, results of operations and prospects of the \$RIVAL Token, the Tokens, and/ or the Company could be materially and adversely affected. In such cases, you may lose all or part of the value of the \$RIVAL Tokens. Such risks include, but are not limited to, emerging market risk, cryptocurrency risk, political climate risk, business risk, climate change risk, pandemic risk and foreign exchange risk.
